

University of Southampton

MA Artificial Intelligence Online

Fully online | Part time | Standard route: 2 years

PROGRAMME OVERVIEW

Build an understanding of artificial intelligence, machine learning and their social implications. The online programme offers a structured route into AI study for applicants from varied disciplinary backgrounds.

STUDY AREAS

- Foundations of artificial intelligence
- Machine learning and statistical learning
- Responsible AI and social impact
- Research design and master's-level research

ENTRY & STUDY ARRANGEMENTS

The standard route is normally two years. The university also lists a performance pathway with a different study duration; assess that route separately. Other universities' Level 7 progression conditions do not apply automatically.

AI digital transformation, criminal justice and other subject pathways must be considered separately and must not be presented as the same degree or compulsory modules of this general AI programme.

FEES & NEXT STEPS

Ask UKEC to confirm current tuition, currency, payment stages, additional costs and intake dates in writing. Admission is decided by the university.
